

INTRODUCTION TO INDUSTRIAL SCALE LTD.

Industrial Scale Ltd. is an independent, Saskatchewan owned, full service Scale Company. We provide sales, service, repairs, calibrations, Measurement Canada examinations, installations, and rentals of all types and brands of scales. We represent numerous manufacturers of various weighing applications. We are Saskatchewan's first scale company accredited to perform examinations on behalf of Measurement Canada.

We can provide calibration and maintenance for your Quality Assurance Programs.

Measurement Canada will no longer be testing the accuracy of scales on a regular basis due to manpower constraints. The responsibility is on the scale owner to ensure the accuracy of their own scales. Giving product away or short shipping your valuable customers is a lose-lose situation.

Should you require any of the following goods and services, now or in the future, please contact our office at 1-800-661-1588 (toll free) or 306-949-1322.
